

## Turbocharge your notebook for high-speed USB 2.0 devices

### Product Benefits

- High-speed USB 2.0 with USB 1.1 compatibility
- Includes USB 2.0 drivers for Microsoft® Windows® 98SE, Me, and 2000 operating systems
- Full USB-IF Hi-Speed certification
- Works on both Macs and PCs
- No external power supply needed in many cases

### USB 2.0 to Go

Now you can take high-speed USB connectivity wherever you go. You get compatibility with today's most popular peripherals and the new, exciting ones. The USB2connect for Notebooks kit from Adaptec® enables your PC or Mac® to work with both USB 1.1 and 2.0 devices. When you're on the road, you'll also appreciate that our solution doesn't require an additional power brick to add weight to your bags. Enhance your computer's portability and performance with USB2connect for Notebooks.

### Go for maximum speed with USB 2.0

USB 2.0 is the fastest USB standard yet released, supporting data speeds up to 480 megabits per second (Mbps). That's 40 times faster than USB 1.1. It makes USB 2.0 an ideal technology for external storage devices, digital cameras, web cams, and much more. \* To make sure your USB 2.0 peripherals really fly, we've included high performance USB 2.0 drivers for Windows 98SE, Windows Me, and Windows 2000.

### Enjoy USB's plug-and-play advantage

The USB standard is simple and easy to use. All you have to do is install the USB2connect for Notebooks card, install the Adaptec USB 2.0 Windows drivers\*\*, and your notebook is ready to take advantage of USB devices. The USB2connect for Notebooks automatically configures itself for USB 1.1 or USB 2.0 operation. Nothing could be easier to set up.

### Travel light

Portability means cutting down on those extra power bricks in your briefcase. USB2connect for Notebooks doesn't require a power adapter. You'll really feel the weight difference when you take along bus-powered devices like web cams and digital cameras. So you can work anywhere without the workout.

### Work with current and future USB devices

USB2connect for Notebooks makes it easy to add the peripherals you need. From thousands of currently available USB 1.1 devices to new high-performance USB 2.0 peripherals you get plenty of flexibility to connect the USB devices of your choice. USB2connect for Notebooks is designed for maximum compatibility.

### Trust the Adaptec Name

When you're getting started with a new high-speed technology, you want to buy products from vendors you can trust. For more than 20 years, Adaptec has made advanced technologies easy to use. Our products are the standard that peripheral manufacturers themselves use to test the compatibility of new products. And we back up our products with a five-year hardware warranty plus our superior telephone and online support.

\* USB 1.1 devices cannot operate at USB 2.0 speeds even when connected to a USB 2.0 hub or host adapter. USB 2.0 devices connected through a USB 1.1 hub are limited to USB 1.1 speeds.

\*\* Please check the Adaptec web site ([www.adaptec.com](http://www.adaptec.com)) for driver support for Windows XP® and Macintosh®.
